The proposal includes all the required fixtures, associated products, and installation controlled by timers already in place and low voltage landscape lighting design to achieve the desired objectives. . All work will be installed in a professional and efficient manner with great care taken to protect existing plantings, walkways and landscape areas. Sleeves, road cuts/ patching, jack and bore, or jetting is included in proposal price. All wiring will be oversized 10 gauge or larger. The fixture wires that terminate at the mainline are crimped and encased in SureSplice synthetic dielectric filled non-corrosive, FDA approved water proof 88 Gel wire connector to ensure no failures of splice points and will be installed at a depth of 6 inches (direct burial) or more. Conduit is included in proposal price. Low voltage lighting simply means energy efficient lighting. Our power source (transformer) will convert the high voltage 120 Volts down to only 12-22 Volts. This will decrease the amount of electricity being used and be reflected on your monthly
